

Attorney's Docket No. Intel Corporation: 10559-516001/P12420

REMARKS

Reconsideration and allowance of the above-referenced application are respectfully requested. New claims and claim amendments are provided to obviate the rejection.

Applicant hereby elects to prosecute the subject matter associated with Fig. 3 and has deleted those claims directed to the subject matter associated with Fig. 2. Hence, any election in the parent case is not carried out through this RCE. It is believed that the prior art does not suggest the subject matter currently claimed. Accordingly, the application should now be in condition for allowance.

It is believed that all of the pending claims have been addressed in this paper. However, failure to address a specific rejection, issue, or comment, does not signify agreement with or concession of that rejection, issue or comment. In addition, because the arguments made above are not intended to be exhaustive, there may be reasons for patentability of any or all pending claims (or other claims) that have not been expressed. Finally, nothing in this paper should be construed as an intent to concede any issue with regard to any claim, except as specifically stated in this paper, and the amendment of any claim does not necessarily signify concession of unpatentability of the claim prior to its amendment.
